

CREEPY CRAWLY SPIDER!

SUPPLIES:

- 1. 1 styrofoam ball**
- 2. 8 google eyes, different sizes if you want**
- 3. 24 black pipe cleaners**
- 4. Black paint**
- 5. Paintbrush, scissors, glue, pencil**
- 6. A wooden skewer or extra paintbrush. A glass a bit taller than the skewer**

DIRECTIONS:

- 1. Press a wooden skewer or paintbrush into the styrofoam ball. This will make it easier to paint and not get too messy!**
- 2. Paint the styrofoam body black and place in the glass to dry completely.**
- 3. Glue the eyes on**
- 4. Using the pencil, press the lead into each side of the spider body where you want the legs to go. Make 4 holes on each side.**
- 5. Twist together 3 black pipe cleaners to make 1 leg. They will look big and fuzzy! Make 8 spider legs!**
- 6. Press each leg into a hole. About half way down, bend each pipe cleaner to make a knee! The spider should stand up on its own now!**
